Discover PEMF Therapy for your pet.

PEMF for animals is commonly used to treat pain, arthritis, inflammation, stiffness, bone injuries, and wounds. It is effective in treating ligament injuries, spinal cord injuries, and neurological conditions. Pulsed Electromagnetic field therapy also relieves the pain and discomfort that many older dogs may experience. The data shows that the PEMF treatment is a safe, non-invasive treatment modality that has the potential to become an important stand-alone or adjunctive treatment modality in veterinary care. The dogs even seem to enjoy the treatment and find it very relaxing. Don't watch your beloved pet suffer any longer. Call today for our introductory special. Dr Rena 8455874988
